About Formnext

Formnext is an International exhibition and conference for next generation of manufacturing technologies, taking place in Frankfurt am Main. Their startup challenge was conducted in partnership with the 3D-Printing Cluster, a network of interdisciplinary actors relating to industrial 3D-Printing.

"Additive Manufacturing has been topic number one for some years now. Many new ideas and developments are finally ready for implementation into the market. An increasing number of new applications prepare the ground with new business models and exciting new companies. The whole manufacturing industry is observing the market carefully to find smart solutions for product development and production."

Awarded Product

3YOURMIND provides software solutions for industrial 3D printing to analyze 3D models, compare materials and pricing in an intuitive online platform. They combine strategic thinking and technological expertise in additive manufacturing for today's industry 4.0. Their software packages are being used by DAX 30 businesses, leading 3D print service providers and businesses around the world. Entire production workflows are streamlined by their additive manufacturing software. The platform provides instant analysis of printability, pricing and delivery time to guarantee a quality 3D print, every time.

"Formnext enables us to connect our 3D printing software solutions with industry professionals and 3D-printing service providers from around the world. The award ensures that we are visible to leading companies so that we can reinvent additive manufacturing together."

Stephan Kühr, Founder and CEO, 3YOURMIND.
